

Nigeria Labour Market Intelligence Dashboard

Key Insights Summary (2020-2022)

Prepared by: Adoza Adams
Data Source: NBS Labour Force Survey
Period: 2020 (Q4) - 2022 (Q2)

Core Problem

Nigeria's high unemployment and underemployment require targeted, data-driven policy interventions. However, labour market data remains underutilized due to lack of accessible visualization tools.

Key Findings

1. National Unemployment Remains Elevated

- **Overall Unemployment Rate:** Approximately 16-18% across the survey period
- **Underemployment Rate:** Significantly higher, indicating widespread informal and part-time work
- **Youth (15-24) NEET Rate:** Approximately 14.6%, representing a substantial population of disconnected youth

2. Significant Regional Disparities

- **Highest Unemployment:** North East zone (28.7% in 2020)
- **Lowest Unemployment:** South West zone (21.65%)
- **LFPR Variation:** Ranges from 83.5% (Nasarawa) to 27.3% (Yobe), indicating stark differences in labour market engagement

3. Top States Requiring Priority Intervention (2022)

State	Unemployment Rate	Key Concern
YOBE	~52.6%	Highest unemployment
GOMBE	~34.9%	High underemployment
JIGAWA	~38.7%	High underemployment
ZAMFARA	~41.7%	High underemployment
KEBBI	~34.7%	High underemployment

4. Recovery Trends (2020 - 2022)

- Most states showed **improvement in 2022** compared to 2020
- States like **Bauchi** and **Sokoto** showed dramatic employment growth
- However, **YoBE, Zamfara, and Gombe** continued to struggle with high unemployment

Recommendations

For Policymakers:

1. **Targeted Rural/Agricultural Programs:** North East and North West states need investments in agriculture and rural infrastructure
2. **Youth Skills Development:** NEET rates in high-unemployment states require urgent vocational training
3. **Regional Economic Diversification:** Promote industries beyond oil/agriculture in South-South and South-East
4. **Data-Driven Monitoring:** Use the dashboard to track intervention effectiveness quarterly

Dashboard Value Proposition

- One-stop visualization of Nigeria's complex labour data
- State-level comparison for targeted policymaking
- Temporal tracking to measure intervention impact
- Interactive exploration for stakeholders at all levels

This dashboard was built as part of the 3MTT Capstone Project (Brief DA-15) using NBS open data.
